

LIST OF REFERENCES ON THE BIOLOGY OF SHRIMP

SPECIAL SCIENTIFIC REPORT-FISHERIES No. 276

**UNITED STATES DEPARTMENT OF THE INTERIOR
FISH AND WILDLIFE SERVICE**

Explanatory Note

The series embodies results of investigations, usually of restricted scope, intended to aid or direct management or utilization practices and as guides for administrative or legislative action. It is issued in limited quantities for the official use of Federal, State, or cooperating Agencies and in processed form for economy and to avoid delay in publication.

United States Department of the Interior, Fred A. Seaton, Secretary
Fish and Wildlife Service, Arnie J. Suomela, Commissioner

A LIST OF REFERENCES ON THE BIOLOGY OF SHRIMP
(Family Penaeidae)

by

Edward Chin and Donald M. Allen
Fishery Research Biologists
Bureau of Commercial Fisheries

United States Fish and Wildlife Service
Special Scientific Report--Fisheries No. 276

Washington, D. C.
January 1959

The Library of Congress has cataloged this publication as follows:

Chin, Edward.

A list of references on the biology of shrimp (family Penaeidae) by Edward Chin and Donald M. Allen. Washington, U. S. Dept. of the Interior, Fish and Wildlife Service, 1959.

iv, 143 p. 27 cm. (U. S. Fish and Wildlife Service. Special scientific report: fisheries, no. 276)

1. Shrimps—Bibl. I. Allen, Donald M., joint author. (Series)

SH11.A335 no. 276 016.5953843 59-60382

Library of Congress

The Fish and Wildlife Service series, Special Scientific Report--Fisheries, is cataloged as follows:

U. S. *Fish and Wildlife Service.*

Special scientific report: fisheries. no. 1-
(Washington, 1949-

no. illus., maps, diagrs. 27 cm.

Supersedes in part the Service's Special scientific report.

1. Fisheries--Research.

List of references - - - - -	43
Additional references - - - - -	142

This paper contains references on the biology of shrimp (Family Penaeidae) and fishing methods and gear used by the shrimp fishery. Works are listed only by authors.

INTRODUCTION^{1/}

The references contained in this bibliography were compiled by the authors in the course of biological studies on commercially important shrimp, a phase of the work carried on by the Gulf Fishery Investigations, U. S. Fish and Wildlife Service. The references are listed only by authors. Although we recognize the limitations imposed by the lack of subject and taxonomic indexes, we decided to release the bibliography in this form to make it immediately available to other workers.

In order to keep the bibliography within reasonable compass, only those references which contain specific mention of shrimp belonging to the family Penaeidae are included. Because many of the publications were not available to us, some are listed incompletely or possibly erroneously; those we were unable to consult have been marked with an asterisk. No attempt was made to gather references on subjects such as the technological aspects of the shrimp processing industry, palaeontological studies, or shrimp statistics, but a few references in those fields are listed. Shrimp statistics are published annually in the Fishery Statistics of the United States by the U. S. Fish and Wildlife Service. Articles dealing with fishing methods and gear have been included because of their general interest to fishery biologists.

We hope that any errors or omissions will be brought to our attention.

^{1/} We are grateful to Mr. Thomas J. Costello, Gulf Fishery Investigations, for supplying us with a number of references and considerable encouragement.
